A new restarting method in the Arnoldi algorithm for computing the eigenvalues of a nonsymmetric matrix

H. Saberi Najafi, E. Khaleghi

Available at: www.ElsevierMathematics.com

2) Algorithm implicit shift in the QR Shifting algorithms with Maple and

Najafi, M. Shams H. Saberi

Available at: www.ElsevierMathematics.com

3) Algorithms for solving c3-spline and Quintic c2-spline Quartic Computational problems value second-order initial

H. Saberi Najafi, S. Krostami, M. Esmaeilzadeh

4) Gulf Persian Numerical Model of the coordinate Spherical

. applications and Techniques Computational

586.1996-579, CTAC95

5) Model Tidal Grid and Coarse Fine of Dynamic Connection

M.D. Teubner, B.Y. Noye, H. Saberi Najafi

1995, 240-235 pacific Atmospheric Proceeding of the ocean and

6) Nesting Dynamic using Gulf Persian the Tides in Modelling

..., Najafi H. Saberi, M.D. Teubner

Noye. Editor, j, processes coastal sea Modelliny

c. 1999, 57-80 scientific publishing World

7) Advective-dispersion with reaction Solving one-dimensional

methods using some finite-difference

H. Saberi Najafi, H. Hajinezhad

in press Journal of Contaminant Hydrology

8) weighted Arnoldi Weighted Restarting method in the
9) 
*advection-dispersion finite-difference methods for solving three-dimensional Two new implicit pollution modelling equation for ground waters*

H. Hajinezhad, H. Saberi Najafi

Press in *Mathematics and Computation Journal of Applied*

10) eigenvalues minimum restarting method in the Arnoldi algorithm for computing the A modification on matrix of a nonsymmetric H. Ghazvini, H. Saberi Najafi

11) algorithms for computing the inverse of a square matrix Computational inverse of a non-square matrix and block matrices quasi review Najafi, M. Shams, for H. Saberi

12) λBx=Ax and (λx=Ax) inertia of eigenproblems A new algorithm for computing the

15) (B,A) computing a few smallest (largest) eigenvalues of pair Weighted FOM-inverse vector iteration method for 246-239 Pages, September 2007 1, Volume 192, Issue 1, *Computation Applied Mathematics and* A. Refahi and M. Akbari, Najafi H. Saberi

16) (B,A) few smallest (largest) eigenvalues of pair FOM-inverse vector iteration method for computing a 647-641 Pages, May 2007 1, Volume 188, Issue 1, *Computation Applied Mathematics and*
A new restarting method in the Lanczos algorithm for generalized eigenvalue problem
